Download

You will be able to control the player and their relationships with each other, all while making improvements to the rides for better rewards! If you've ever dreamed of working on the biggest fairground in the world, this is your chance! This version includes the following features : New fairground : Everything you need to know to open a successful fair in NoLimits 2! New fairground progress : More than just a visual indicator of the progress towards opening a world, the progress towards opening the new fairground has a gameplay effect on it! New fairground visitors : When the fairground is open to the public, new people will arrive, and you'll be able to interact with them! New fairground visitors quest : You can send them on quests that will increase the amount of kudos you receive in exchange for your new rides. New rides : NoLimits 2 is a world-building game. A little while ago, I added a few new rides to the game. They're now in the new fairground and are ready for you to experience! Nepher's Octagonal Pavilion: This is the most practical ride. Its shape can be changed to an octagonal shape for when the new fairground is open to the public. The Quadruped: This can jump and the operator can turn the direction the animals can travel in. The Crab: This car can be used to lure visitors to the fair. The Tuning Station: This car is best used for providing directions to visitors. The Antithesis: This car is able to create unique and personal lines in the fairground. A new type of poll results have been added. Now when the player enters the new fairground, they'll be greeted by a poll in which they can vote for the rides that they want to see added to the new fairground. To celebrate the announcement of the new fairground, I've updated the base game with a bunch of new maps, a few new ride scenes, and some new fairground maps for you to use! One of the new maps will be available for you to use when you're in the new fairground and it's also the same map that's being used in the beta for the new fairground. With the new beta of the new fairground also comes a bunch of new ride scenes. The player won't be able to use these maps 82157476af
